# Directory management

- Instructors can access several directories to manage the documents necessary for their pedagogy
- They allow them to communicate easily
  - With their colleagues
  - With their students
- Special directories allow playing network games

Beijing University of Posts and Telecommunications - Operations Management and EDD

Gérard BAGLIN

# Document Management

- **Open**
  - Click to open/execute the selected document
  - Action depends on file type
- **New Document**
  - Allow to create a new document : select the type of document to create
- **Delete Document**
  - Deletes selected document after confirmation
- **Copy Document**
  - Copies selected document to another (sub)directory
  - Enables to change the name
- **Upload document**
  - Copies selected document to user computer
  - **Not available to students**
- **Download Document**
  - Enables to select a document on the computer and copy it to the selected (sub)directory
  - Available only when working on the '**My documents**' directory

# Directories

# Instructor Personal Documents

- Partner trainers have permanent access to the "Partners - Personal Documents" course even if they do not teach in an active course
- Whatever course they connect to, they have access to their personal documents for an unlimited period of time
- They can upload (restore) all types of documents
- They can save these documents on their computer
- They can create/delete subdirectories

# Student Personal Documents

- For each course, students have a personal directory
- They can create subdirectories
- They can upload (restore) all types of documents
- *They can not download any documents*
- *They cannot communicate documents to other students*
  - *But see next slide about student project directory*
- They can communicate documents to the teacher of the course by the "Submit document" function

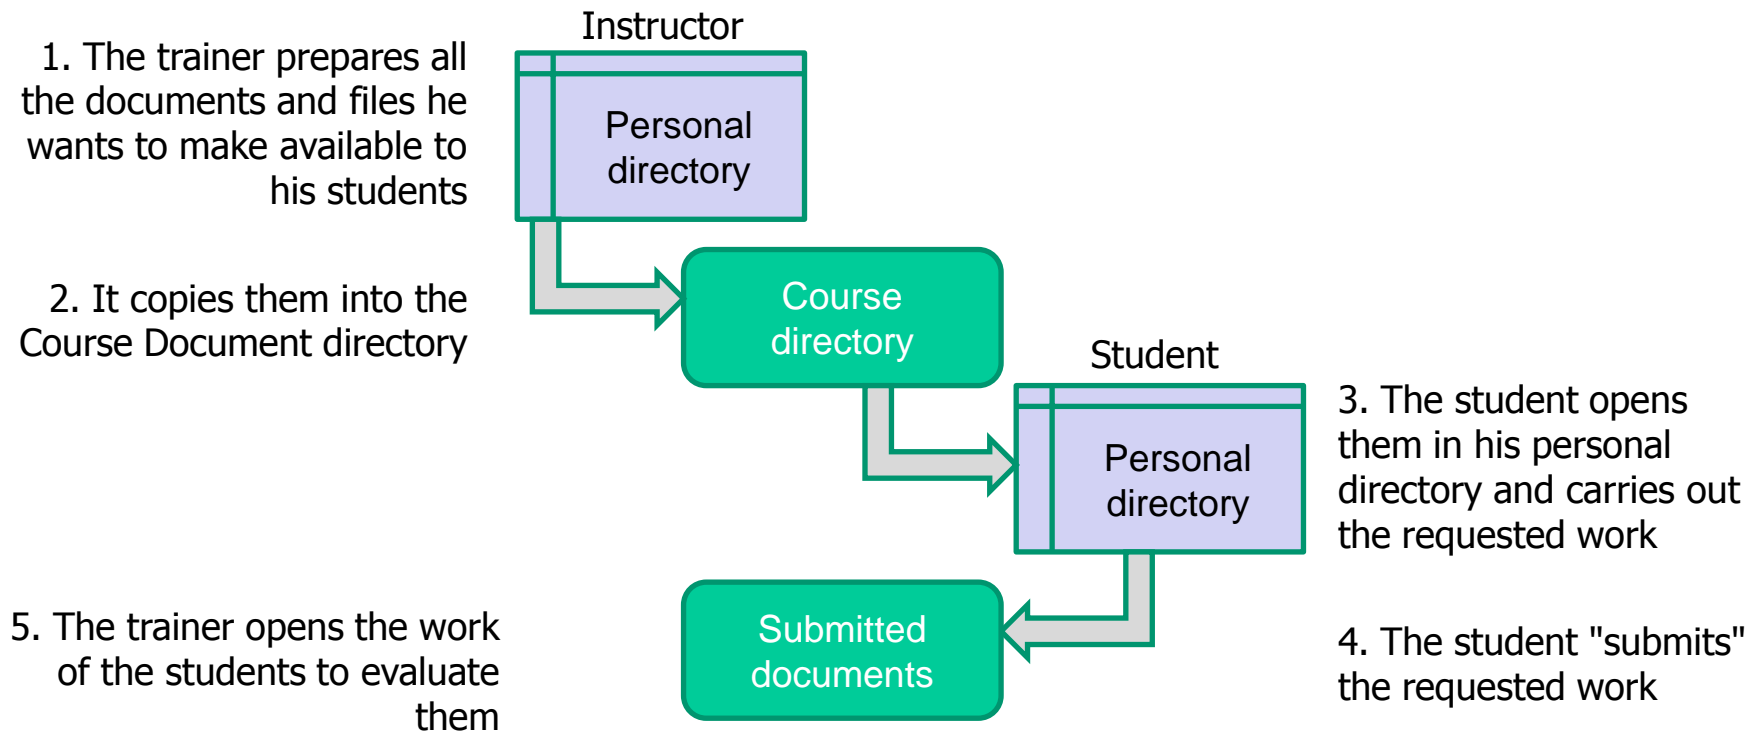

# Student Projects Directory

- Accessible to license level C
- If several students have to work on joint projects, the trainer can ask to open a course with the **Projects option**
- A **Student Projects** directory appears
- The instructor can create subdirectories
- Students enrolled in the course can copy their own documents and access documents filed by other students of the course

# Course directory

- When they connect to a course, instructors have access to the Course Documents directory
  - **Not when the connect to Partner – Personal Documents**
- They must copy the documents they want to make available to the students of the course
- They can create subdirectories
- On the **Participant page**, the trainers have access to the student **submitted documents** to visualize (and to grade) the documents submitted by the students of the course

# Instructor - student communication

# Shared folders directory

- Accessible to license level C
- **Objective:** to show simultaneous access to the same database
- A shared folder with simultaneous access to several students
  - Simultaneous access to multiple functions
  - Caution: no simultaneous access protection
- A basic folder must be copied by the instructor in this directory
- The instructor can copy the shared folder into his personal space

# Private documents

- The **Private Documents** directory is only visible to instructors
- It contains the documents that are the property of an **institution**
- A instructor of a course of an institution can copy documents there that will be visible only by the instructors who connect to a course of the institution

# Common documents

- The **Common Documents** directory is only visible to instructors
- It is a means of communication between the instructors and between the instructors and the support
- They can copy and open all documents
  - Warning: all documents can be seen by all instructors

# Public documents

- One directory per language
- The **Public document** directories are permanently available for instructors as well as for students
- When you open a folder from this directory, it is copied to your personal directory

# Public Solutions

- One directory per language
- The **Public Solution** directories are only visible to instructors
- Exercises answers are permanently available for instructors
- When you open a folder from this directory, it is copied to your personal directory

# Network game directories

- Accessible to license level C
- When the teacher opens a network game, a subdirectory with the name of the game is created in the directory **Network games**
- Students can access it to open the company folders of the game
- The game can be saved from the **Game Monitor** function

# Additional Modules

- The "modules" contain specific teaching materials
  - Can be proposed by all instructors
  - Ordered separately at the course opening
- Various content
  - Cases
  - Games
  - Presentations of case solutions
  - Simulation tools
  - ...

# Summary

Directory	Visibility	Student	Instructor
